Tungsten carbide insets with precisely worked out structure guarantee to grip the needle securely.

- Beveled edges to prevent catching of suture material
- Soft working catch provides safe handling.
- Gold-plated handles for easy identification

Veterinary Dentistry is the way to improve your bottom line and your clients appreciation of what you do.

An often quoted figure is 80% of all small animals over 2 years of age have some form of periodontal disease.

Dentistry should not be thought of as cosmetic, but rather a total health solution as periodontal disease can and does affect the heart, lungs, liver and kidneys. Bad breath is the first sign—and owners hate it.

You will need:

* An air driven dental unit, preferably with a fibre optic light in the high speed handpiece to enable you to see what you are doing.

* A Scaler that can scale sub-gingival pockets, the source of plaque and ultimately calculus.

Hand scaling is too laborious and too time consuming. With the right equipment and a lecture or two from a veterinary dental specialist you are on your way. A canine can be extracted from start to finish in under 10 minutes.

iM3 have 3 dental stations to suit your needs

iM3 GS Deluxe Dental System

1. Corian® work surface
2. Pressurised ultrasonic scaler coolant outlet
3. Multiple outlet power strip
4. Low speed handpiece

14. High speed handpiece flush system
15. Corian® top with built in magnetic bur holder

Are you building a new hospital or refurbishing an existing hospital ward?

Provet can help you.

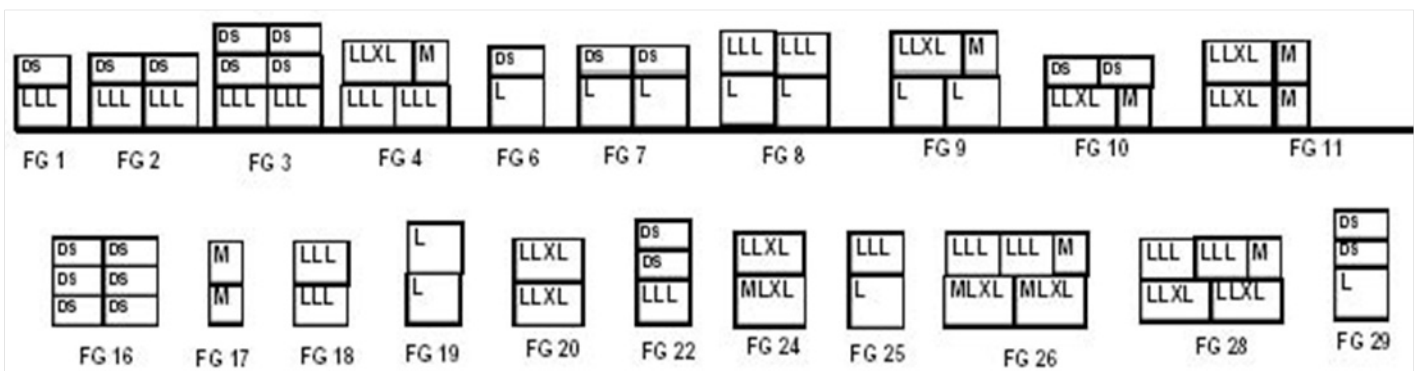

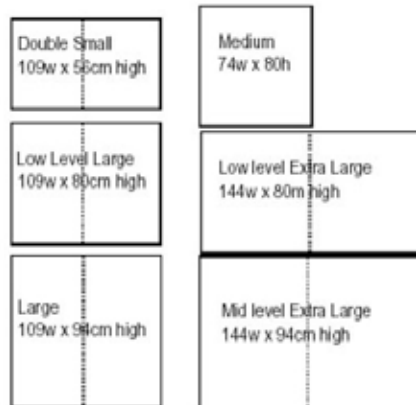

Your Business Account manager in conjunction with one of our instrument and equipment specialist can discuss your requirements and organize a business solution for you. We can suggest appropriate cage sizes and modules and help you maximize the space you have. We can liaise with your builder to ensure delivery of any equipment you may require at the appropriate time for installation.

Provet is the distributor for Easyvet products which are manufactured in Australia. The quality is far superior to any other overseas brands.

Provet can make your refurbishment or the building of your new hospital that little bit easier by helping you with all your instrument and equipment needs.

Fibreglass Cages

- * Australian designed and manufactured
- * Sanitary, easy to clean. Smooth finish with radius corners
- * All cages except medium have standard dividers
- * Cages slope slightly to front for easy drainage
- * Drains and troughs standard
- * No centre pillars, remove and insert divider while doors closed
- * Supplied assembled, ready to use
- * All cages are 68cm deep; 75cm deep with waste trough
- * 6 cage sizes available in 26 standard modules
- * Locks on 2 front wheels
- * Optional end panel
- * 5 year warranty on fibreglass
- * 10 year warranty on doors
