

TASKS FOR THE VETERINARY ASSISTANT

0781742439 • Paula Pattengale

A\$RRP \$81.40
NZ \$97.68

This step-by-step guide gives detailed instructions on how to perform the tasks of the veterinary assistant. It is an ideal everyday reference for veterinary support staff and for students in veterinary assisting programs. The book is based on a list of recommended skills developed by the Association of Veterinary Technician Educators (AVTE).

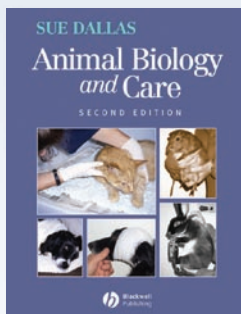

Step-by-step instructions explain how to prepare for and perform the necessary tasks, and the concise format lets readers quickly identify the information they need. The spiral binding allows the book to lie flat on a workspace for easy reference during a procedure.

A back-of-book CD-ROM contains slides and video clips that demonstrate the tasks and PowerPoint slides for instructors.

ANIMAL BIOLOGY AND CARE SECOND EDITION

1405137959 • Sue Dallas
(Walford & North Shropshire College)

A\$RRP \$76.95
NZ \$79.14

Following the success of the first edition, this new edition has been expanded to include more information on small mammals, birds and fish. Intended as a foundation text for those on animal care, nurse auxiliary and veterinary care assistant courses, it introduces essential theoretical background information and clearly outlines the practical skills necessary when embarking on the care of any animal.

- Designed specifically to meet the requirements of animal care, pre-veterinary nursing auxiliary and care students;
- Provides basic training in animal biology and care, with particular attention given to those subjects that students find difficult to understand, such as anatomy and physiology;
- New chapter additions on fish and birds.

Clearly and simply laid out, with over 150 illustrations, Animal Biology and Care 2e will be invaluable to all those training or working in animal care.

EQUINE VETERINARY NURSING MANUAL

0632057270 • Karen Coumbe (Equine Vet, Bell Equine Clinic, Kent, for the British Equine Veterinary Association (BEVA).)

A\$RRP \$191.00
NZ \$229.20

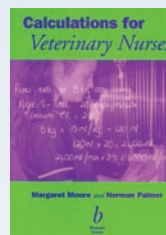

This definitive textbook for equine veterinary nurses will be invaluable to all those involved in the care and management of sick horses. Endorsed by the British Equine Veterinary Association (BEVA), this book covers the syllabus for the new Royal College of Veterinary Surgeons equine veterinary nursing certificate. Key subjects include: medical and surgical equine nursing; equine stud medicine; basic equine management, and the theory underpinning all these and other important topics.

The book also includes innovative chapters on nutrition, imaging, anatomy and physiology. The subject matter is presented in a clear and easily assimilated format, appropriate for all involved in equine nursing.

CALCULATIONS FOR VETERINARY NURSES

0632054980 • Margaret Moore (Cerverus Training, Remenham, UK,) and Norman Palmer (Accountant.)

A\$RRP \$52.95
NZ \$63.54

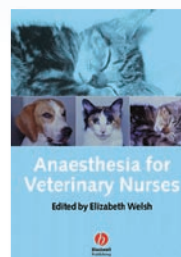

Review: "every veterinary practice should keep a copy in its library, so that the practice nurses can remind themselves of how to work out calculations in their day-to-day work. This is a very readable..."

This handy pocket book will help veterinary nurses with all types of calculations. Numerous worked examples are included to develop the reader's confidence in carrying out the procedures involved. Each type of calculation has its own separate section in the book and the authors have used the simplest possible method in explaining each one. The book is structured in such a way that the reader can progress from a simple explanation of the arithmetic principles involved, to the application of these principles to essential veterinary calculations.

ANAESTHESIA FOR VETERINARY NURSES

0632050616 • Elizabeth Welsh
(Private Practice, Peebles, Scotland)

A\$RRP \$115.00
NZ \$138.00

Sedation and anaesthesia are a crucial part of veterinary practice. The protocols and methods involved are often complex and vary considerably from animal to animal. The veterinary nurse has a pivotal role in anaesthesia, being directly involved before, during and after the anaesthetic period.

This is one of the only books to address the needs of veterinary nurses. This book provides detailed coverage of the physiological, pharmaceutical and physical aspects of anaesthesia, and contains detailed sections on rabbits, rodents, birds, reptiles, and larger animals.
