

NEW! THE FELINE PATIENT

3e 9780781762687 • Gary D. Norsworthy

AU\$180 NZ \$216

The Feline Patient is the ideal clinical reference for busy practitioners wanting rapidly retrievable, concise information about feline diseases. The new full-colour edition has been greatly expanded to cover more diseases and syndromes. Highlights include new sections on dermatology, ophthalmology, behavior, and dentistry; expanded formulary and surgery sections; and the most extensive collection of feline radiographs and ultrasound images ever published.

Topics are organized alphabetically to facilitate quick access to diagnostic, therapeutic, and prognostic information - all tailored specifically to the unique needs of cats. The editor of the book, a busy feline practitioner himself, understands the unique needs of feline patients and the desires of cat owners, and has designed this book to meet the needs of busy practitioners worldwide.

NEW! FELINE MEDICINE & THERAPEUTICS

3e 9781405150590 • E.A. Chandler, C.J. Gaskell and R.M. Gaskell

AU\$130.50 NZ\$156.60

Feline Medicine and Therapeutics 3e primary object is to help veterinary surgeons and students to practice the art and science of feline medicine. The increase in popularity of cats as pets has driven the rapid development of feline medicine in recent years. Fully revised and updated, this third edition of a popular reference and text reflects the considerable increase in knowledge in this area.

- The definitive reference manual on feline medicine and therapeutics is now available in paperback.
- Completely comprehensive - covers everything from behaviour problems to the complete anatomy of the cat
- Satisfies the demand for up-to-date scientific information for the veterinarian
- Thoroughly revised to include all the latest developments in the field
- Includes invaluable contributions from recognised veterinary experts from around the world

NEW! BLACKWELL'S FIVE-MINUTE VETERINARY CONSULT CLINICAL COMPANION: SMALL ANIMAL DENTISTRY

9780781762304 • Heidi B Loprise

AU\$148 NZ\$177.60

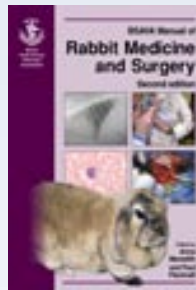

This unique manual is the ideal clinical reference for practicing veterinarians, a quick reference for students on rotations, and a supplemental or core text for related classes in the DVM program. In a user-friendly format true to the popular Blackwell's Five-Minute Veterinary Consult series, coverage includes a wide spectrum of small animal oral and dental diseases, ranging from conditions of abnormal development, periodontal and endodontic diseases to tumors and traumatic injuries. Additional features include a collection of client handouts and sections devoted to feline-specific conditions and basic treatment of exotic pets. Introductory chapters cover diagnostics and dental techniques. With over 200 photographs and full-color throughout, this quick reference is a must-have for all small animal veterinarians and veterinarians in training.

NEW! BSAVA MANUAL OF RABBIT MEDICINE AND SURGERY

2e 9780905214962 • Anna Meredith & Paul Flecknell

AU\$165 NZ \$198

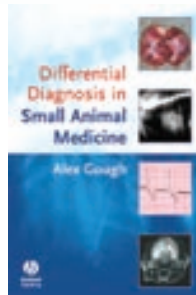

Following on from the success of the first edition, this BSAVA Manual has been revised to take account of the advances made in rabbit medicine and surgery over the past few years. The unique aspects of rabbit anatomy and physiology and their consequences for husbandry and disease are highlighted. Dietary recommendations, weight reduction strategies, breeding and hand-rearing are all expanded. Step-by-step guides are given for the basic clinical techniques. Systemic disease chapters have been updated and enlarged, and a new chapter on cardiovascular disorders reflects the increase in information on this topic. New stand-alone chapters on dentistry and surgical procedures allow greater detail and increased illustration. New handy tables on applications and doses of therapeutic agents help to make this Manual a 'must' for the practice bookshelf.

NEW! DIFFERENTIAL DIAGNOSIS IN SMALL ANIMAL MEDICINE

9781405132527 • Alex Gough

AU\$68.50 NZ\$82.20

Veterinary practitioners and students are presented with many different and complex cases, and are expected to offer an accurate diagnosis quickly. The differential diagnosis list is one of the most important aspects of the problem-oriented approach to clinical diagnosis. Finding good lists in a readily available form can be difficult, and can involve laborious reference to multiple texts and sources. Differential Diagnosis in Small Animal Medicine brings this information together in one place in an easy reference
