

KRUUSE Muzzle Guide

NEW!

KRUUSE **Extreme** Dog Muzzle

- Safe and strong dog muzzle with strategic addition of struts at front nose area to eliminate all possibilities of biting
- Tough and durable, yet flexible and soft
- Dog friendly in terms of feeding (nibble and water) and panting
- Variable collar adjustment

The KRUUSE Extreme Dog Muzzle is a comfortable dog muzzle designed to protect against bites.

The safety strapping ensures that the dog muzzle will always remain in place and it features two additional points of secure attachment. The loop at the bottom is designed to attach to the dog's regular collar.

The muzzle has a secure metal buckle with pre-holed webbing, to ensure easy adjustment and a good fit. The KRUUSE dog muzzle is made from injection moulded thermo plastic rubber, which is extremely tough and durable.

The neoprene padding inside of the webbing straps ensures that it is snug, yet comfortable for the dog to wear. The dog can pant, drink and be given treats to ensure optimal welfare of the dog while wearing the extreme muzzle.

Tough and durable material for security purpose

Allows drinking, panting and vomiting

Inhibits biting, chewing and barking

Difficult for dog to dislodge

Sizing

The best way to choose the model size is to use the weight/breed guidelines, as long as the patient is not over or underweight.

If the dog is not at an ideal weight, or is between sizes, we recommend that you use these measuring instructions:

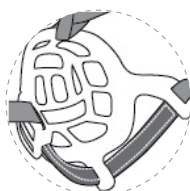

- Use a soft measuring tape, measure the length of the dog's snout from the end of his nose to the point where the snout starts to slope upwards to the eyes as shown on the drawing
- Then, measure around the widest part of the dog's snout while its mouth is closed
